SAVE YOUR EYES.

OUR

SPECTACLES

And Eye Glasses are the best for falling sight. Cut and polished from the "Bent Stone, inverted umbrella, except that the conthey are perfectly transparent (will out glass like a diamond). Being harder than the glass, neeting bars, representing the ribs of they receive a finer pollsh and always retain it. One pair carefully taited to your eyes will the umbrella, are swivelled, and work last as long as ave pairs of the best glass, besides preserving the sight almost unimpaired all on points at either end. It can grasp that time. By our new system for testing the sight, we are enabled to suit any eye so accumulately that no injurious effects will follow. We repair Spectacles and Bye Glasses, and insert Pebbles or the best Glass Lenses in old frames. Our Bi-Focal Spectacles are for old people by means of an engine of sixteen horsewho require spectroles to see far off as well as near by only one pair being required. To persons who cannot call on us we send our new illustrated Brice List which shows how to order.

Watering Horses.

In regard to watering horses immeintely after a full feed of grain; a writer in the Stock Journal says: "The first effect of this is to largely distend the stomach, and the resul were masticated grain and saliva. But should this danger be avoided, matters are not necessarily left in a better state. The sudden and excessive influx of water is likely to wash on much of the contents of the stomach into the intestines before the nitrogenous are the result. Fven this is not all. water on the mucus membrane of the stomach and intestines causes vascular contractions, so that all tend to digestive disorder of a dangerous nature, Here you have the result in a nutshell. should never be watered, beyond a few quarts, when heated. In fact, it is not safe to give a horse any water when much heated.

Let's be Economical

We have from sheer necessity begun to be economical. Let us continue it.

Let us build smaller houses; let us furnish them more modestly; let us liveless luxuriently; let us tune all our

A new edition of Prentice's Poems, beautiless luxuriently; let us tune all our personal and social life to a lower key. We have bravely begun reform in publie and corporate affairs. Let us con-We are committed to a reform in the civil service -a reform which will extinguish the trade of polwhich will extinguish the trade of pol-ities that has done so much to debauch Weekly Courier-Journal, a Year..... and impoverish the country. Let us see to it that this reform is thoroughly and of twenty and over at \$1.50 each.

[Postage in all cases prepaid by the propriet effected. Our cobble-houses have tumbled about our ears; let us not rebuild them. Our speculations lie in men, application.

Letters should be addressed to theorbed. Our fictitious values have een extinguished; let us not try to re light the glamour that made them. Above all, let us be content with mod est gains, cease trying to earn wealth in a single day, and get something out of life besides everlasting work and worry. Fully one-half of our wants are artificial.

.... An ingeniously constructed and ef- J.POYNER . . Proprietor. feetive steam excavaton has been in troduced on one of the Scotch railways. In its arrangement, and in the action of its various parts, this machine is said to resemble somewhat an The cylinders themselves are immense, and around the cylinder, on the inner side, weights are placed to

the extent of some 280 tons, the object of arranging this enormous mass in such a position being to provide against the probability of the adjacent ground subsiding to a degree which would be highly dangerous.

A new hypothesis as to the nature of electricity has been officred by Prof. Renard, of Nancy. He considers an electric current to be produced by longitudinal motion of the other particles which, at the same time, have a general forward motion. When the melecules of the body are surrounded by a greater ether atmosphere than the by a greater ether atmosphere than the normal, the body is in that condition which is called positively electric; when the ether atmosphere about each molecule is less than the normal, the body is negatively electric. M. Ren-ard has sought to explain various elec-trical phenoumena thus. For example, the magnetization of steel needles by electrical discharges-regarding which it has heretafore been shown hat, according to the position of the need'e, it acts in one direction or the
